

# DAKTRONICS FIXED DIGIT SCOREBOARD CHECKLIST

Use this checklist to kick off the season and prepare for your games with confidence. We recommend completing this season readiness check **2-4 weeks before your first event**, giving you enough time to fulfill any potential service or parts needs.

## Checklist Task

**Visually inspect the front of the scoreboard for any physical damage such as bent digits, excessive dust and dirt buildup, corrosion or water intrusion. If a wireless signal is used between the display and the controller, check for broken or missing antennas.**

**Turn on power to the scoreboard and watch for the Power-On-Self-Test (POST), which lasts for about 5 seconds. LEDs will turn on across the scoreboard, and then go blank.**

**If the signal between display and controller is wireless, capture the radio settings. The scoreboard will indicate current settings at end of POST sequence, showing broadcast (b) number and channel (c) number.**

**Use your All Sport controller to conduct an "all on" test to confirm that no LEDs are out. Refer to [What are "all on" or test codes for All Sport consoles?](#) to find the test code for your console.**

Was there an issue? If yes, refer to the resource below.

[How to clean your scoreboard](#)

[What to do if your display is damaged](#)

[Order replacement antennas](#)

[My scoreboard did not go through the POST](#)

[My scoreboard is too dim](#)

[LED Scoreboard digit has one or more segments blank, partially blank, or lit all the time](#)

If there are LEDs out, note the location of the LED (down digit, left home score digit, etc.) in a new service case in your [MySupport Account](#).

# DAKTRONICS FIXED DIGIT SCOREBOARD CHECKLIST

**If applicable, turn on the power to any Delay of Game clocks. Watch for and verify the POST.**

[My clocks did not go through the POST](#)

**Simulate a game to ensure that information displays in the correct location on the scoreboard.**

[Scoreboard does not display correctly or is blank, wrong sport code](#)

[Scoreboard showing incorrect information](#)

**Verify that you have all recommended spare parts, such as extra display modules and power supplies, in one location and in working order. Other suggested parts and tools:**

To order spare antennas [click here](#).

For all other parts, create a new service case in your [MySupport Account](#).

- **Scoreboard radio antennas (Daktronics Part# A- 3173)**
- **Scoreboard driver (Daktronics Part# OA-1782-3001)**
- **Radio receiver (Daktronics Part# OA-1110-0160)**
- **T-handle or 1/8" Allen wrench for video modules**

## After completing the checklist:

If you identified any issues, please refer to our [Knowledge Base](#) articles for resources on how to resolve the issue. If you have exhausted these available resources, please contact Daktronics support by creating a new service case in your [Daktronics MySupport account](#). Don't have a MySupport account? Create one [here](#).
