1. Get Content

- A. Import from **external source**
Recommended Formats: Videos - **.mp4** Images - **.png** and **.jpg**
*See Manuals and Training Folder for more detailed information
- B. Create in **3rd party software** (i.e. Photoshop, After Effects)
- C. Create in **Content Studio**
 1. Click **Pencil Icon** in upper right corner of Display Studio
 2. Click the upper left “V” icon and choose **OPEN**
 3. Choose display type you want to create content for
 4. Insert image or animation
 5. Insert Text Box – format as desired
 6. Choose duration of layouts (slides) in the timeline

2. Save Content to “CONTENT” Folder

- All Content from above must be saved to the “**Content**” folder on desktop
 - * “Content” folder is a networked folder on the DMP computer
 - * Must be connected at the press box to save to “Content” folder
 - * Sub-folders may be created

3. Create Button in Display Studio

1. In Display Studio **right-click** in blank area of desired sport tab. Click “**New Button**”
2. Type the **name of the button** on at the top of the properties window
3. Click the “**+**” button at left of the window.
4. Click “**1**” and choose **DMP-8000 Player Control**
5. Click “**2**” and choose desired ZONE on which to play content.

-
6. Click “**3**” and choose function of the button – **Play** is the most often used
 7. Click “**4**”, click “**Add**” and choose the file from the content folder that you want the button to play
 8. Choose **category color** at the top right (not required)
 9. Click “**Save**”

*To change the properties of a button, **right-click** and choose “**Properties**”

***Copy/Paste buttons** by right-clicking a button and choose Copy (Ctrl+C). Then paste by right clicking in desired location and choose Paste (Ctrl+V)

***Add a Sub-Page:** Right click in blank area and choose “**New Page**”
